

# **The distribution box cannot be secured to the guide rail**

## Overview

---

This usually involves using expansion bolts or screws to securely mount the cabinet to the wall. Make sure the walls are strong enough to bear the weight of the box and electrical equipment. For this purpose, Telegärtner has developed the train approved dis-tribution box, called RDB. Because of its tested reliability against vibrations and shocks and also heat, coldness and humidity, the RDB is perfectly suited for use in harsh environments. PDS terminal equipment (wall jacks/ports) must be located in a Secret or higher Controlled Access Area (CAA), Secret or higher vault, Secret or higher Secure Room or in a SCIF.

## The distribution box cannot be secured to the guide rail

---

## Do you know how to fix the distribution box?

---

Wall Mounting: One of the most common methods is to fasten the distribution box to the wall. This usually involves using expansion bolts or screws to securely mount the cabinet to the wall.

## STIGQter: STIG Check Details: SV-40980r4\_rule: Protected

---

In exceptional situations, when the PDS termination area cannot be access controlled to the level of the data carried by the PDS (e.g., in a multi-use conference room), ensure the PDS termination point

## **Cautions and Requirements for Installation of**
