

The red light on the fiber optic switch is always on

Overview

For LOS (Loss of Signal) red lights on fiber or advanced gateways, it usually means the incoming optical line is not detected or has low signal. Double-check that the fiber line is connected properly and that there's no bend or physical damage. However, when it blinks red or stays solid red, it signifies a Loss of Signal, a problem preventing your router from communicating.

The red light on the fiber optic switch is always on

Modem & Router Lights Explained , BroadbandSearch

The PON or optical light is your most important ONT indicator -- it tells you whether the fiber cable itself is delivering a signal from your provider's network. A red or blinking PON light almost
