

The switch s light is too strong

Overview

Screen brightness can be adjusted only while in handheld mode or tabletop mode. Enable/disable automatic brightness, or manually adjust the screen brightness by. The only thing that I know to try is to go into maintenance mode and initialize the console while keeping save data to see if it's just a software bug that can be reset. How can one go about diagnosing the exact issue with the switch?

I want to increase my skills in fixing electronics, so any advice?

Is this a good question?
