## Overview

---

Maximum temperature for advanced fiber optic cables can exceed 300°C continuously. Optical fiber's ability to withstand extreme heat and cold directly impacts signal integrity, network reliability, and maintenance costs, especially in harsh environments like industrial facilities, outdoor installations, and data centers. 5m to 2m—that has a factory-terminated connector on one end and bare fiber on the other end. Its thick layer of protection is used to connect the optic ow c nnectors are Eq ipment ■ ic nal Loss≤0.
