

# **UAE Small Cable Tray Standards**

## Overview

---

In the UAE and KSA, a typical steel ladder or perforated cable tray comes in standard lengths of 2,440 mm and 3,000 mm. Widths offer far more variety, usually ranging from a narrow 50 mm up to 1,200 mm. Common side depth (or height) options are 50 mm, 75 mm, 100 mm, 150 mm . Choosing the correct electrical cable tray dimensions is a foundational step that ensures project success in the demanding environments of the UAE and GCC. It's more than just fitting cables; it's about guaranteeing safety, meeting local compliance, and building in capacity for future growth. List of regulations and Clauses which do not apply to existing Electrical Installations 107 A5. The EMI-Tray system incorporates a Light Duty system used particularly for data, Fibre Optic and general light use areas, a Medium Duty system for light industrial/commercial applications and a Heavy Duty system for most industrial conditions. Especially in Dubai, where rules are tight, no one wants to risk penalties or rework because something didn't meet the safety code. Steel Industries LLC based in Ajman UAE, are the leading manufacturer and suppliers of cable management systems in the UAE, Africa and Middle East countries such as Oman, Kuwait, Qatar, Saudi Arabia, Iran, Iraq etc.
