

UK CIF price for large core diameter optical fiber G 657A2

Overview

657A2, the higher-performance bend-insensitive grade used in data centres and tight-radius applications, has reached approximately \$35 per kilometre — roughly double its mid-2025 price. 652D optical fiber prices are rising in 2025–2026, how FTTH cable budgets are affected, and what procurement teams in Europe, Latin America, Africa and the Middle East can do to manage risk. Specialty G657A2 Fiber: As you are experiencing, prices for G657A2 fiber have surged past the \$20 mark and are currently trading in the range of \$60 to \$70. The causes are structural, they are not going away quickly, and understanding what is driving the market is key. In the Chinese market, prices have surpassed 40 CNY per core kilometer, marking the highest point in nearly seven years, with cumulative increases ranging from 94% to 144% since late 2025. Leviton is dedicated to designing, developing and manufacturing sustainable high performance structured cabling and specialty cabling solutions. EasyBand® Plus G657A2 bending insensitive single-mode fibre combines two attractive features: excellent low macro-bending sensitivity and low water-peak level.
