

Warranty period for AQ-6370D spectrometer

Overview

Warranty is provided for 30 days for parts and labor, starting from delivering the unit in Taiwan. Test Equipment Solutions Ltd specialise in the second user sale, rental and distribution of quality test & measurement (T&M) equipment. We stock all major equipment types such as Spectrum Analyzers, Signal Generators, Oscilloscopes, Power Meters, Network Analyzers etc from all the major suppliers. This instrument enables high speed measurement of the optical properties of LD and LED light sources, optical amps, and other devices. World-Class Optical Performance Wavelength range: 600 to 1700nm High wavelength accuracy: ± 0 .

Warranty period for AQ-6370D spectrometer

Optical Spectrum Analyzer AQ6370D

In order to obtain sales under this warranty, customer must notify Fiber-Mart of the defect before the expiration of the warranty period and make suitable arrangements for the performance of sales.

Model AQ6370D-01, AQ6370D-02 AQ6370D Optical Spectrum

They are not strictly guaranteed. Safety specifications, EMC and environmental standards are the same as those of standard model of the AQ6370D.

Optical Spectrum Analyzer AQ6370

AQ6317 EMULATION MODE The AQ6317 series is Yokogawa's best-selling optical spectrum analyzer. Since there are so many existing users all over the world, the AQ6370 supports private remote

Yokogawa AQ6370D-12 Optical Spectrum Analyzer (OSA) Calibration

The AQ6370D, AQ6374, AQ6375B and AQ6376 offer a universal type optical connector system for optical input and calibration output enabling direct coupling to popular styles of optical connectors.

Rent or Buy Yokogawa AQ6370D Optical Spectrum

Rent or purchase a Yokogawa AQ6370D Optical Spectrum Analyzer 600nm to 1700nm or other Optical and Lightwave Test Equipment for your testing

AQ6370D Optischer Spektrumanalysator

Das AQ6370D kann leistungsfähige Quellen wie optische Verstärker und Pump-Laser für Raman-Verstärker aber auch sehr schwache optische Signale messen.

AQ6370D Telecom Optical Spectrum Analyzer , Yokogawa

The AQ6370D is the latest iteration of the most popular Telecom class OSA from Yokogawa. It offers a versatile wavelength range of 600 nm to 1700 nm ideally suited for both Telecommunications and

AQ6370 Series Optical Spectrum Analyzer

The AQ6370D, AQ6374, AQ6375B and AQ6376 offer a universal type optical connector system for optical input and calibration output enabling direct coupling to popular styles of optical connectors.

AQ6370D Optical Spectrum Analyzer User's Manual

In the manual, the symbol is used in conjunction with the word "WARNING" or "CAUTION." Calls attention to actions or conditions that could cause serious or fatal injury to the user, and precautions

Used Yokogawa AQ6370D Optical Spectrum Analyzer,

Order the Used Yokogawa AQ6370D Optical Spectrum Analyzer, 600 to 1700nm from Transcat. Fresh calibration certificate included!

Yokogawa AQ6370D -- comprehensive Specifications for Optical

Yokogawa AQ6370D. Explore detailed specifications for optical fiber measurement devices, including wavelength accuracy, resolution settings, and sensitivity levels for various fiber types.

Yokogawa AQ6370D Datasheet

We fully test & refurbish equipment in our in-house, traceable Lab. Items are supplied with manuals, accessories and typically a full no-quibble 1 year warranty.

AQ6370 Series Optical Spectrum Analyzer

The AQ6370D monochromator is specifically designed to offer excellent stray-light suppression capability without using the High Dynamic Mode setting which could increase the measurement time

AQ6370D Yokogawa

The AQ6370D is the latest iteration of the most popular Telecom class OSA from Yokogawa. It offers a versatile wavelength range of 600 nm to 1700 nm ideally

AQ6370D Telecom Optical Spectrum Analyzer , Yokogawa

It offers a versatile wavelength range of 600 nm to 1700 nm ideally suited for both Telecommunications and general-purpose applications. The unique free space input design allows testing of both DWDM

Introducing AQ6370D Optical Spectrum Analyzer

The new Yokogawa AQ6370D benchtop optical spectrum analyzer, the successor to the company's best-selling AQ6370C, incorporates a number of new functions designed to enhance its accuracy

AQ6370 Series Optical Spectrum Analyzer

Our long experience working with customers in the optical Test & Measurement Industry has enabled us to design the world's most reliable and versatile Optical Spectrum Analyzers. In fact they feature

Yokogawa AQ6370D

It offers a versatile wavelength range of 600 nm to 1700 nm ideally suited for both

Telecommunications and general-purpose applications. The unique free space input design allows testing of both DWDM
