

What is the length of the pigtail fiber specification

Overview

Each pigtail consists of a short length of 900µm tight-buffer fiber with a factory-installed connector on one end and an exposed fiber on the other. This design allows for quick and easy splicing to another fiber or cable, ensuring a secure and efficient connection. They provide low-loss integration between trunk cables and equipment through fusion splicing. LINK fiber optic pigtail support application such as 25/40/50/100/200/400Gbps Ethernet, IEEE802.
