In this detailed video, we'll walk you through the fiber optic pigtail splicing process -- from preparation to final testing.

Understand pigtail Splicing for Termination

You have two primary methods to join the pigtail to the field fiber: fusion splicing and mechanical splicing. Each has its place, and knowing when to use which is key to your success.

Piecing together optical-splicing products , Cabling

Both pigtail-splicing and field-connecting have their benefits. With pigtails, connectors are all pre-tested, connectorization skills are not required,

Tips for getting faster at splicing? : r/FiberOptics

You may be able to cut the time by splicing whatever you can pick up first and only putting on the shrink tube when you're going to clean and cleave. This makes it so that you don't have to touch a fiber
