## Overview

---

Its MTP/MPO-8 connector is not strictly a standards-recognized infrastructure interface. It is an application that uses 8 of the 12 fiber positions of the industry standard MTP/MPO-12. Imm (main cord) Material Stainless Steel Color Silvery White UL94 V-0 (\*Burning stops within 10 seconds on a vertical specimen, no drips of flaming particles. These cables are commonly used for indoor installations where multiple fibers are needed for various applications. The number of fibers changes how you set up your network and how much you can grow it later. 8 Core GYTC8S Fiber Optic Cable Armor Stranded Loose Tube Steel Wire Strength Waterproof Figure 8 Self Supporting Outdoor GYTC8S is a typical self supporting outdoor fiber optic cable, suitable for aerial applications; The cable have nice moisture resistance performance and crush resistance.
