

# **Which department has jurisdiction over optical fiber cables**

## Overview

---

In the United States, the Federal Communications Commission (FCC) is the primary agency responsible for regulating telecommunications, including fiber optic networks. The FCC's responsibilities include: ISPs are overseen by multiple agencies, from the FCC and FTC to state governments. Multiple government agencies at the federal, state, and local levels regulate Internet Service Providers in the United States, with no single. These fiber optic cables, which use light to transmit data, offer unparalleled speed and bandwidth compared to traditional copper cables, making them indispensable for both individuals and businesses. On January 16, 2025, BIS published a rule titled "Implementation of Additional Due Diligence Measures for Advanced Computing Integrated Circuits; Amendments and Clarifications; and Extension of Comment Period", which included a timeline during which certain companies are considered authorized. For specific legal guidance or to ensure compliance with relevant laws and regulations, businesses should consult with a qualified legal professional or regulatory expert.
